

LL60 series cable sets are flexible alternative to corrugated cables. Usable upto 6 GHz. These are typically used in long antenna runs where low loss is of prime importance. Traditionally corrugated cables have been used for such applications. LL60 now offers an attractive alternative to corrugated due to higher flexibility as compared to corrugated types. The RF/electrical parameters of LL60 and corresponding corrugated types are similar.

APPLICATIONS

- Long run antenna feeders
- Radars, ESM, ELINT systems
- Ideal 'flexible' replacement for corrugated cables like Heliac (same electrical properties)
- **RF Shielding** is 90 dB. This is 30dB higher than 60dB (typical) for single shielded RG types.
- **Flexibility:** LL60 series are quite flexible as compared to comparable corrugated types. Whereas it is quite difficult to route and bend corrugated cables, LL60 series can be routed easily between connection points.

- Equivalent to RFS LCF12-50 and Andrews LDF4-50

- Ideal replacement for corrugated types for advantage of **FLEXIBILITY**

CABLE CONSTRUCTION

Mechanical Specifications

Electrical Specifications		Mechanical Specifications	
Impedance	50 Ω	Inner Conductor	BCCAl, 4.5mm dia.
Frequency Range	DC ~ 6 GHz	Dielectric	PE, Foamed
Velocity of Propagation	87 %	Outer Conductor	Aluminium Tape
Capacitance	76.7 pF/m	Braid	Tinned Cooper
Shielding Effectiveness	> 90 dB	Jacket	Black PE, 15mm dia.
Operating Temperature	-40°C to +85°C	Bend Radius: installation	80 mm
		Weight	0.20 kg/m

Attenuation & Power Handling Data

Frequency (GHz)	0.03	0.05	0.15	0.22	0.45	0.9	1.5	1.8	2	2.5	5.8
Attenuation dB/100 ft	0.5	0.6	1.1	1.4	1.8	2.7	3.5	3.9	3.9	4.6	7.5
Attenuation dB/100 m	1.6	1.9	3.5	3.9	5.8	8.5	10.9	12.3	12.9	14.7	23.9

Specifications for Flexible Low Loss Cable Assemblies for Outdoor use

Length Connector 1 Connector 2

- Should be flexible and bendable, easily routable & non-kink type
- Cable should conform to MIL-C-17, Connectors to MIL-PRF-39012

Cable Electrical Specifications

- Frequency of Usage : DC~6 GHz
- Shielding Effectiveness : 90 dB or better
- Velocity of Propagation : > 86 %
- Impedance : 50 ohms
- Capacitance : 76.7 pF/m
- Power (Average) : > 500 W @ 2 GHz
- Loss : < 0.14 dB/meter @ 2 GHz
- VSWR : < 1.3 (DC~6 GHz) for straight connectors

Cable Construction

- Outer Diameter : < 15.5 mm
- Centre conductor : Solid BCCAI
- Dielectric : Foamed Polyethylene
- Outer conductor : Aluminium Tape
- Overall braid : Tinned Copper
- Jacket : Black Polyethylene
- Strain Relief : Reliable strain relief at the cable to connector joint should be provided. A double strain relief with progressive stress distribution is preferred

Cable Mechanical and Environmental Specifications

- Weight : < 0.22 (kg/meter)
- Bend Radius : < 80 mm
- Working Temperature : -40°C to + 85°C

Connectors Specifications

- Attachment Method : Inner Solder, Outer Crimp/Clamp
- Frequency Range : DC~6 GHz
- Material : Brass with Nickel alloy plating
